COMMERCIAL BBD TOKEN REDEMPTION TERMS & CONDITIONS SCHEDULE

Buffalo Biodiesel Inc. (Privately Held NY C-Corp, Est. 2005) • Base Mainnet Contract: `0x3a3c13AEd283d7Ae0A0Fa4C1858e21dfe9a2c564` • Commercial Benchmark: $5.00 USD / BBD

1. Pure Utility & $5.00 Settlement Parity

Commercial Voucher Only: BBD Token is strictly a commercial purchasing unit—not corporate stock. It carries zero equity in Buffalo Biodiesel Inc., zero voting rights, and zero dividends or sales-revenue splits. Any future corporate capital raise for investment purposes will utilize a separate traditional vehicle (such as a private placement)—never BBD Token.

$5.00 USD Invoice Parity: Each `1.00 BBD` applies at **$5.00 USD** toward approved commercial quotes, purchase orders, leases, utility invoices, and credit schedules, subject to wholesale MOQs, freight/taxes, and plant lead times.

15% On-Chain USDC Floor: Holders may also invoke `redeemForUsdcFloor` directly on Base Mainnet to burn BBD for their pro-rata share of the contract's locked USDC Floor Vault.

2. Eligible Products, Recycled Lines & Utilities

Bio-Products & Energy: Refined Used Cooking Oil (UCO) feedstocks, Biochar, Green Electricity, Renewable Natural Gas (RNG), Form Release (*Buffalo Bio Release*), Industrial Degreasers (*Buffalo Bio Degreaser*), and Biogas Booster (*BBB-WDG*).

Recycled-Material Family: Repurposed Steel Slag aggregates/cementitious products, Anaerobic Digestate bio-fertilizers, and circular industrial materials (available per commercial production and facility rollout schedules).

Services, Rent & Utilities: Waste wood recycling & tipping services, commercial tenant rent, waste-heat absorption HVAC (heating/cooling), and industrial campus utilities under executed commercial agreements.

3. Puro.earth, Federal, State & Future Credits

Carbon Credits & On-Chain Burn: Covers verified carbon reduction and biochar removal credits—including **Puro.earth CORCs** and ISCC attributes. Retirements execute via `burnToRetireAttributes` on Base Mainnet, permanently destroying BBD to `0x000...0000` and linking the transaction hash to the retired registry serial number to prevent double-counting.

Federal, State & Future Credits: Covers eligible federal and state clean-energy, renewable fuel, environmental, and transferable tax credits currently available or enacted in the future, subject to counterparty qualification, registry rules, and mandatory statutory settlement rules (including 26 U.S.C. § 6418 compliance).

KYB & Venue: Commercial redemptions require standard KYB/OFAC screening. Governed by New York law (Erie County, NY). Redemption Desk: **1-800-721-1427**.
