# A Letter from Our President & Chief Legal Officer: Official Launch of the BBD Commercial Utility Token

**To Our Commercial Partners, Suppliers, Customers, and Community:**

For more than twenty-one years, Buffalo Biodiesel Inc. has operated with a single industrial mission: transforming waste streams into high-value renewable energy and sustainable commercial products. From our beginnings in August 2005 with a single location and two trucks to a multi-state logistics and processing enterprise serving more than 30,000 commercial locations across 15 states, our growth has always been driven by practical, in-house engineering and real-world operational execution.

Today, we are proud to announce the official launch of the **BBD Token (Ticker: BBD)**, a strictly functional commercial utility token developed in-house by Buffalo Biodiesel Inc. and deployed on the Base Mainnet blockchain (`0x3a3c13AEd283d7Ae0A0Fa4C1858e21dfe9a2c564`).

## Built Strictly for Commercial Utility & Circular-Economy Settlement

Unlike speculative digital assets created to raise passive venture capital, the **BBD Token is strictly a commercial utility token**. It was developed in-house by our team to serve as a standardized unit of commercial settlement, supply-chain accounting, and verified environmental-attribute retirement for the purchase and trade of Buffalo Biodiesel's current and future industrial products and services. Our founder and his engineering team have more than 8 patents pending and over a dozen in the pipeline that will generate new eco-friendly products and services that will enhance the lives of people globally.

## Current & Future Products Powered by BBD Token

Commercial customers, industrial counterparties, and sustainability partners can use BBD Token directly for the purchase, settlement, and trade of our expanding portfolio of recycled, carbon-reduced, and carbon-negative commodities and products:

- **Refined Used Cooking Oil (UCO) & Renewable Feedstocks:** Direct commercial settlement for our core refined liquid biofuel feedstocks and supplier collection credits across our 15-state operating network and 12 facilities.

- **Recycled, Carbon-Reduced & Carbon-Negative Industrial Products:** Purchase and trade of our commercial bio-based chemical and maintenance lines, including recycled **tire shine and dressings**, heavy-duty **industrial bio-degreasers**, **concrete form release agents** (*Buffalo Bio Release*), **asphalt rejuvenators** (*Buffalo Bio Shield*), and high-carbon **biochar** soil amendments manufactured at our Elk Street campus.
- **Renewable Natural Gas (RNG) & Green Electricity:** Commercial settlement for clean renewable natural gas and green electrical power produced through our anaerobic digestion and thermal conversion infrastructure.
- **Novel Pipeline Products from Waste Tires, Steel Slag & Waste Wood:** Forward commercial access to breakthrough circular-economy products and advanced industrial materials in our R&D and production pipeline made from **recycled waste tires**, **carbonated steel slag**, and **reclaimed waste wood**.
- **Irreversible On-Chain Carbon & Environmental Attribute Retirement:** Using the smart contract's native `burnToRetireAttributes` function, holders can permanently retire BBD Tokens on-chain to record verifiable carbon abatement and sequestration tied to our ISCC-certified recycling and biochar operations.

These are exciting times for Buffalo Biodiesel Inc., and we hope you will join us—as commercial customers, supply-chain partners, and environmental leaders—in putting the BBD Token to work across a cleaner, circular American industrial economy.

> Sincerely,
> **FRANK V. BALON, ESQ.**

### Verified On-Chain Specifications (Base Mainnet — Chain ID: 8453)

| On-Chain Parameter | Verified Base Mainnet Detail |
|---|---|
| **Token Name, Symbol & Decimals** | **BBD Token** • Symbol: **BBD** • Decimals: **18** |
| **Verified Smart Contract Address** | `0x3a3c13AEd283d7Ae0A0Fa4C1858e21dfe9a2c564` |
| **3-of-5 Corporate Treasury Safe** | `0xe956bFaD1f088BC2A79cAF90115027Fb2015b16B` |
| **Primary On-Chain Liquidity Venue** | Uniswap v3 (**BBD / Native Base USDC** `0x833589fCD6eDb6E08f4c7C32D4f71b54bdA02913` • **0.30% Fee Tier**) |
| **Commercial Settlement Benchmark** | **$5.00 USD / USDC** per 1.00 BBD (`purchaseFromTreasuryWithUsdc` & `burnToRetireAttributes`) |

> **REGULATORY & COMMERCIAL UTILITY DISCLOSURE:** BBD Token (**BBD**) is a functional commercial utility and environmental-attribute settlement instrument developed in-house by Buffalo Biodiesel Inc. for consumptive use across its industrial recycling, green chemical, RNG, green electricity, and carbon-abatement network pursuant to *United Housing Foundation, Inc. v. Forman*, 421 U.S. 837 (1975) and *SEC v. W.J. Howey Co.*, 328 U.S. 293 (1946). BBD Token is strictly a commercial utility asset—not an investment contract, security, or financial derivative—and is not offered or marketed for passive speculative investment returns.
